

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2.

My husband is a blind person and there are programmes he would like to watch on television that are inaccessible. My description of a programme (if I have time to give it) is just not adequate. He should be able to enjoy TV as much as a sighted person but at present this is often impossible. AD on all programmes would make a big difference to him.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

There should be AD on at least 20% of programmes and ultimately on everything.
