

Question 1: Which of the three options do consultees favour, and why?:

option 2 because the more ad programmes across a wide range of subjects the better

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

ad menu listings on freeview and satellite t.v would be fantastic.

Comments:

I like the beep system on screen and menus that tells me if the programme is ad before I select the channel. I use satellite tv, I dont know if this function is available on freeview.
