

Question 1: Which of the three options do consultees favour, and why?:

Option 2. If it had been higher I would have gone for that but if 20% is the best they can do then that's what I'll go for. I would like as many audio described programmes as possible.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Audio description on the programmes is brilliant. It's not the quality but the quantity that needs to improve.

There needs to be more awareness of what audio description is.
