

Question 1: Which of the three options do consultees favour, and why?:

Option 2 because I feel that it would be advantageous for visually impaired people to have audio description on as many channels as possible to enhance their viewing pleasure.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Ideally i'd like to see the quota increased to 100%.

Comments:

It is imperative that visually impaired people receive much more audio described programmes to enhance more understanding of the programme being "watched" and listened to.
