

**Question 1: Which of the three options do consultees favour, and why?:**

I favour the second option, providing for the increase of Audio Description to 20% of content on all television channels. As a blind person, I have found that the increased availability of Audio Description over the past few years has enabled me to enjoy TV far more than before. Television has become a cultural thoroughfare in society throughout the two last generations and unparalleled area to this area of modern life has enabled me to, in a sense, feel a greater link with the world and people around me through an enhanced common experience of entertainment.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**
