

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2. An increase in audio description to 20 per cent for all channels required to provide access services. This would result in all channels providing audio description on 20 per cent of their output. I think raising the target to 20 per cent would significantly increase blind and partially sighted people's enjoyment of TV.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

**Comments:**
