

Question 1: Which of the three options do consultees favour, and why?:

Option 2. It offers me access to Television programmes which would have been inaccessible.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Reliability - when audio description is offered it should be there as sometimes in the past it has been missed.

Issues with audio description missing in parts of programmes - Part 1 audio, description Pt 2 none.

In some cases, the quality of audio description has been poor. (Not describing enough detail - however some describers are very good)
