

Question 1: Which of the three options do consultees favour, and why?:

Option 2. Because I'm registered blind I listen to tv and having AD is a very, very big help. Unfortunately, only 10% of programme makers provide this and for registered blind and partially sighted persons we need at least 20%.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Noted that one of the tv broadcasters that never seem to do AD is channel 5 and also occasionally itv3. Possibly this is to do with cost but would like to hear AD on these channels.

Has noticed that sometimes AD is not available on a programme but is available on the repeats. Not sure why this is - can this be addressed?
