

Question 1: Which of the three options do consultees favour, and why?:

Option 2 There should be more Audio discription available it enables a person with a visual problem follow a progreem with out keep saying whats that what are they doing . Most annoying for the person watching and the person listening. And it is also a good point that people can warch TV a on their own and enjoy what they are been told.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

All TV services should have audio accessibility

Comments:

People should not have to campaign for audio information into days world it should be access for all the age of the computer is here to stay let make it work for people with a visual problem and for the kids in the future.
