

Question 1: Which of the three options do consultees favour, and why?:

Option 2 because I would like to see audio description across the board. I find the audio description service crucial.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Sometimes when audio description is used they can get the character names wrong.

Sometimes there is inconsistency with the embedding in terms of volume.

It would be great to see more DVDs audio described.
