

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2 because I am registered blind and this would increase the programmes that are available to me. I don't watch soaps, which are usually audio described, but I do watch other programmes that have audio description.

When trying to buy a new television there is often no mention of audio description in the features list because of how little there is currently on TV.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

It makes a big difference to me as I'm registered blind.

The thing that amazes me is that the news isn't audio described.

**Comments:**

There needs to be more awareness of audio description. It really needs to be publicised.
