

**Question 1: Which of the three options do consultees favour, and why?:**

I favour option two, as I think increasing AD to 20% would be great for visually impaired people. AD has changed my life, and has given me the equal chance to enjoy tv as much as a sighted person. I think that if AD was increased to 20% I would enjoy many more tv programs

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

**Comments:**

I really hope this is successful, as AD is great, and changes peoples lives.
