

Question 1: Which of the three options do consultees favour, and why?:

Option 2

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

AD is very important to visually impaired people, especially when viewing programmes which have a lot of action and not much speech. By ensuring broadcast providers have to have AD, you are allowing non-sighted individuals to enjoy tv viewing as much as sighted people. this cannot be underestimated in an age where action films and programmes are becoming more technically advanced and digital tv is being introduced into all homes by 2012.

Comments:

Your website is not particularly accessible. I suggest you look into this when encouraging people with screen readers to participate in a consultation of this nature.
