

Question 1: Which of the three options do consultees favour, and why?:

Option 2, as this would give the widest choice of availability of audio description on all platfors and take into account the expansion of digital television in the future as new channels are launced.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

To increase the number audio described braodcasts to match the level currently braodcast with subtittles, to give people with sight loss the same equality, access and enjoyment of television.
