

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2, because we know that AD makes the most enormous difference to the lives of sight impaired people, and to their ability to access mainstream television. Many of our sight impaired service users have requested that we respond on their behalf: there is a huge strength of feeling about the need to expand AD provision to give greater equality for sight impaired people in accessing information and entertainment.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**
