

Question 1: Which of the three options do consultees favour, and why?:

Option 2 because I use audio description a lot and it would be good to see an increase. Some films aren't audio described and would really benefit from being so.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

It would be great if the EPG was audio described.
This would make it easier to set audio description up.

Comments:

I'm very glad that audio description is available - it has helped me out a lot.
