

Question 1: Which of the three options do consultees favour, and why?:

Option two

I believe that everyone in society should have access to the widest possible range of programmes and not be denied full access because of a disability

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

20% for all stations is a good start, and i feel that once service providers got used to providing 20% access across the stations programmes that it would be much more likely that they would voluntarily increase that percentage

Comments:

Good luck with the consultation
