

Question 1: Which of the three options do consultees favour, and why?:

Option 2 - because I would appreciate further choice in the types of programmes available with audio description. Currently the choice is very limited.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

1. I would like there to be speaking electronic programme guides on Sky, Freeview etc, along with speaking prompts to help with remote button selection

2. I would like TVs to have a separate audio channel for audio description for private listening during family watching to be used with headphones.
