

Hi

As a blind person I rely on audio description where ever it is available which currently is not enough. It would be fantastic to see mor AD on TV as it gives visually impaired people a chance to enjoy something that sighted people take forgranted.

You should try and watch (for example) Eastenders with your eyes closed. You will find that about 4 out of 5 times the bit before the bong is done in silence. I have to text my friend on these occasions so I know what happened. VERY FRUSTRATING"! Try it!!!

Please put my name down on the campaign for more Audio Description please.
