

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2. This would enable me to have a more enjoyable experience when watching programmes. I have no sight and i find it very difficult to follow the story lines and know what is going on. Audio description would make a drastic difference to mylife and would revaltise my enjoyment of television. I would be able to fully understand what is going on in the programme and would not miss any aspects of the programe such as facial expressions.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**
