

Question 1: Which of the three options do consultees favour, and why?:

20% on all digital channels - because TV is such an important element of today's culture & society and we need to be increasing access, not reducing it.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Carry out consultation through special interest groups and also through televising information about consultations like these.
