

Question 1: Which of the three options do consultees favour, and why?:

I favour option 2 because it provides for the maximum audiodescribed programming on the most number of TV channels. I would also urge Ofcom to increase audiodescribed programs on a regular basis so that eventually all programs that can be audiodescribed are.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

More work needs to be done on providing access to the equipment EG set top boxes and TVs which include freeview as standard. audiodescription is fantastic but if you can't turn it on through the set top box or the TV it is useless.
