Question 1: Which of the three options do consultees favour, and why?:

Option 2. Audio description makes a phenomenal difference to viewer. Is able to choose what he watches by audio describe.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

Essential that technology is developed to announce channel and programme title at the very least.
The rational is that it is impossible to choose what you want to watch if you cannot see screen due to range of programmes and channels available.
