

Question 1: Which of the three options do consultees favour, and why?:

I favour option 2 because currently the amount of audio described programs provided is insufficient and I am personally not interested in the programs provided.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

I suggest there should be a wide variety of programs with audio description. I don't watch soap operas and would appreciate some more interesting choices.
