

Hi,

I would like to respond to your consultation on whether the amount of audio description should be increased or not. I strongly believe it should be increased to 20% for all digital channels. As someone with a visual impairment I think there should be as much audio description as possible in order for people with a visual impairment to have as much access to information on programmes as possible. I hope this option will be supported by you.

If you are publishing the results of the consultation I am happy for my name to be on the list of consultees.
