

Question 1: Which of the three options do consultees favour, and why?:

Option 2 because some of the channels that I switch over to don't always have audio description. If there's something interesting that I want to listen to It's very helpful to have the AD explaining what is happening. At the moment I have only got it on the main channels and only some of the Sky channels.

Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:

There is room for improvement but it is done very well so far in my opinion. More audio description in cinemas would be great.
