

**Question 1: Which of the three options do consultees favour, and why?:**

Option 2 because it would increase the accessibility for tV programmes for me and other visually impaired viewers.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

Possibly audio announcements of channel names/programme guides, though I do understand this could be hardware dependent, as it would make it much easier to find a particular programme I want to watch

**Comments:**
