

**Question 1: Which of the three options do consultees favour, and why?:**

keep audio visuelle commentary on 20% if not 50% on programmes so that the blind can not only listen to the programmes but also we must understand the audio visuelle commentry act as their eyes. maybe the people who are trying t cut bck in this service should sit with their eyes shut through a film , and them again the same film with the audio visual commentry and appreciate the benifits!!! and what hey would be depriving the blind of.

**Question 2: Do consultees have any further suggestions for future access service provision? If so please provide the rationale for these suggestions:**

**Comments:**

keep audio visual commentry on tv.
