NOTES:

This table has been prepared using published data on existing stations to help begin the debate about the criteria for defining "small" and "large" stations for the purposes of any possible future digital upgrade. For indicative purposes only, we have categorised each station under each of the four straw-man criteria set out in section 7 of the consultation.

* Some assumptions have been made for areas where DAB multiplexes have been awarded but not launched. This in no way implies carriage delays have been agreed or any Ofcom obligation on those stations to launch on DAB.

** Where there is no DAB multiplex planned, an assumption has been made, based on the size of the area.
