

Q1 Do you agree with Ofcom's view that the proposed non-emergency healthcare service represents a justified use of a three-digit number? Please give reasons for your views. :

yes, health is important and we have 4 digit numbers for games/futilities, therefore why not having an easy to remember number for health.

Q2 Do you agree with the DHs view that:

**A) a three-digit number is the best choice for the proposed service and
B) of the three-digit numbers available, 111 is the best option?**

Please give reasons for your views. :

Yes 3 digits as it is the same for some other countries in Europe (for child protection, homeless help... in France for instance)

I have no special opinion on 111 rather than another one

Q3 What are your views on the tariff options selected by the DH? :

A free call seems appropriate.

Having another non geographical number being charged at an alleged local price but not included in any calling plan is not a good idea.

Q4 Do you have any comments on the proposed notification of modification to the Numbering Condition in Annex 8 of this document:

no
