

Dear Rhona Parry,

Re: Ofcom's Second Public Service Broadcasting Review – Phase One: The Digital Opportunity consultation

Just responding to your consultation to say that Ofcom should consider accepting community television as public service broadcasters. So, when it comes to NvTv in Belfast, we'd like you to consider supporting them to be carried on Freeview as a local public service broadcaster. That way everyone in the city gets to have access, plus we'd like to see other local public service television stations in the UK so we can exchange programming and really make music on the airwaves!

Nothing in this letter is confidential.

Yours sincerely,

mojoFURY
