

As a Gaelic speaker a publisher and a regular user of the language, I would like to strongly support the recommendation which has been made by Ofcom regarding TG4.

In my opinion, it stands to reason that the recommendation which is being made by Ofcom should be put into operation - that is, that space should be given to TG4 on Mux 2 in the North.

Of course, it is required of the authorities under the Good Friday to ensure that TG4 is available throughout the North.
