

Name: Antony Stevens

Representing: Self

**What are your comments on these proposals?**

My concerns are in the area of Proposal 3 particularly , I am a regular radio listener and find that My Local DAB reception is still restricted ( TN14 5NE postcode ) and have not bought, although I have tried, a DAB radio , and question whether the issues surrounding this "performance postcode lottery" can be addressed over the next 5 years. My other point is that I , and many others , listen to the radio whilst travelling by car and I cannot see this group who also get valuable traffic information through this media reaching a 50% benchmark over the time period.
