What are your comments on these proposals?:

It is all very well saying that you will have end dates on switching off of analogue services, but so far I have seen nothing in these proposals on what will happen to the various small stations when all this happens. As someone who has had DAB for over 5 years, I can also say this current version we in the uk, is just not good enough, in terms of signal quality.

My main concern however is the fact that these various large radio groups, want switch off as soon as possible, so they can have a monopoly. To sum up, I think you are taking far to much notice of what these big radio groups are telling you. I fear we will end up with wall to wall auto stations (a.k.a Gcap) with no chance of any real competition.
