

Name: Edwin Stuart Hawkins

What are your comments on these proposals?:

Like many of your respondents I believe that the AM/FM broadcasts should not be swithced of for some considerable time.

1. The shere volume of sets and systems to be replaced is extremely high and therefore economicly very expensive.
2. The disposal of the obsolete equipment will be a recycling nightmare.
3. Car radios are still predominantly FM and to swith over before the vast majority are DAB will see a huge rise in auto crime that would dwarf that when cassetes cave way to CD.
4. FM is excellent and now available and appreciated by most people.

FM? IT A'INT BROKEN SO DONT FIX IT
