**What are your comments on these proposals?**

Proposal 3. We can only reliably receive DAB radio through our TV aerial and freeview box. We have a DAB portable radio but it is difficult to get a good enough signal. The sound keeps breaking up. FM AM and LW all give better quality listening.

If analogue radio channels are switched off it will mean that we will not be able to listen to radio if the TV is in use.

We are in the middle of merseyside, not in a remote location. The DAB signal needs to be greatly improved before analogue switch off is considered.
