What are your comments on these proposals?:

Please don't switch off AM and FM. DAB radios use much more power and I need to run my radio on batteries. I've gone back to AM as my batteries last for about 4 months compared to a week or two with a DAB radio (which is after all a mini computer).

Given the Government wants households to save power I can't see that we should force everyone to have power hungry DAB radios plugged in to the mains.
