

Question 1: Do you agree with Ofcom's proposal to exempt users of Citizen's Band (CB) radio (and other related applications such as Community Audio Distribution) from the need to possess a Wireless Telegraphy Licence.: Yes, I have have 5 old CB radio sets which I no longer use except to dust off occasionally to see if they still work. As a result I have not held a licence to use these for almost 20 years. It seems quite unnessesary in this day and age for a need to licence such short range devices. The usage of these devices must be so small it would barely recover the costs of admin.

Question 2: Do you agree with Ofcom's proposals to permit the use of 'Micro' FM transmitters in the UK, and to authorise that use by licence exemption.: Yes, I own one of these things and have done for over a year now. They are fairly primative things that barely cover their intended distance in any case. If anything they should be made a little more powerful (please bear that in mind for UK users) but a range of 2m is not really going to interfere with other radio users. And in anycase a FM station with a signal strong enough for an auto tuner to lock on to will walk over the output of these devices anyway. Lift the ban and stop making me feel like a criminal.

Question 3: Do you agree with Ofcom's proposals to exempt users of High Density Fixed Satellite Services (HDFSS) terminals from the need to possess a Wireless Telegraphy Licence.: Don't know what they are, sorry but yeh why not.

Question 4: Do you agree with Ofcom's proposals to exempt users of Inmarsat GAN terminals from the need to possess a Wireless telegraphy Licence.: Don't know what they are, sorry but yeh why not.

Question 5: Do you agree with Ofcom's proposals to make available the frequency 24.05-24.25 GHz for use by short range radar (including automotive applications) devices on a licence-exempt basis.: If nothing else is using that spectrum then yes why not. Why make safety systems more expensive than they need to be.

Question 6: Do you with Ofcom's proposals to make available the band 2.4 GHz-2.4385 GHz for movement detection systems.: If nothing else is using that spectrum then yes why not. Why make security systems more expensive than they need to be.

Question 7: Do you with Ofcom's proposals to remove the need for users of most radar level gauge equipment to possess a Wireless Telegraphy Licence.: Yes

Question 8: Do you agree with Ofcom's proposals to exempt users Digital PMR 446 from the need to possess a Wireless telegraphy Licence.: Yes

Question 9: Ofcom would welcome comments on it proposals to implements these changes concerning short range devices.:

Question 10: Ofcom would welcome comments on it proposals to implement EC Decision 2005/928/.::

Question 11: Ofcom would welcome comments on it proposals to implement EC Decision 2005/513/.::

Question 12: Ofcom would welcome comments on any of the minor changes set out in this chapter and any other broader issues in relation to its approach to licence-exemption.:

Additional comments:
