

Question 1: Do stakeholders agree with the proposals for the award of licences in the 10 GHz, 28 GHz and 32 GHz bands in 2007?: MLL agrees with the format of the auction. MLL would like to see both national and regional licenses offered but there is scope for bidders to control the market through this approach. Consideration needs to be given to anti competitive behaviour to prevent this issue occurring.

Question 2: Do stakeholders agree with the proposal to include in the award of the 32 GHz band that portion of the band that has been open since 2003 for point-to-point applications?: MLL agrees with this approach

Question 3: Do stakeholders agree with the proposals to defer the release of the 40 GHz band and review the position in two years? time?: We agree with this approach.

Question 4: Do stakeholders have any other comments on the contents of this document?: no coment

Additional comments: MLL welcomes the opportunity to respond to this consultation. Overall MLL does support the release of the 10, 28 and 32 GHz bands. MLL would like to see more consideration given to the use the the MOD may have for the 10 GHz band. The effect of the MOD use may have significant impact on valuations of this band.
