Dear Mr Sonke

**Ofcom consultation on the Award of Available Spectrum: 10GHz, 28GHz, 32GHz and 40 GHz .**

I am providing the Welsh Assembly Government's response to Ofcom's consultation on the award of spectrum in these bands.

We understand and agree with Ofcom's intention to award spectrum in the 10GHz, 28GHz and 32GHz bands with technology and usage restrictions that are the minimum necessary for the efficient management of the radio spectrum and the avoidance of undue interference.

We further support Ofcom's position with regard to deferring the award of bandwidth in the 40GHz band and welcome Ofcom's intention to review this in the light of market and technology developments or future interest in this band.

Yours sincerely

Christine Cook
