

Consultation title: Radio Restricted services and 55 to 68 MHz

From: Wm. Douglas Telford

Representing (self or organisation/s): access Audio Ltd

Thank you for your kind invitation to respond to your consultation document regarding licensing for ADS in the 55 - 68 MHz range.

My only observation based on experience of trying to sell and then installing such systems is that potential customers are not happy with the high cost and very short duration of the licence. An annual licence would be much more acceptable and presumably the cost would not be pro rata as the administration time would be very much less of a component.

Regards
