

Question 1: Do you agree with the proposal to liberalise the restrictions on the issuing of S-RSLs in all areas where a new commercial service is advertised, or where a new commercial or community service is due to be, or has recently been, launched? If you do not agree with this proposal, please set out your preferred alternative explaining why you believe it would be a more appropriate option.: Agree

Question 2: What is the most appropriate way for Ofcom to decide between competing short-term RSL applications for broadcasts to cover the same event in the same area at the same time?:

Question 3: Do you have any comments on other areas of S-RSL policy, as set out in the 'Notes for Applicants', that you would like to bring to our attention?: The 20m metre above ground aerial limit can be restrictive. In built up areas this can cause patchy reception due to higher buildings in the vicinity of the transmitter site. Likewise, it might not be possible to get a transmitter site on the highest point central to the target reception area, leading to poor reception in the lee of even a small hill. Suggest that recommended maximum is 20m, but licence application also allows a request for a higher aerial location with suitable justification.

Question 4: Do you agree with the proposal to allow commercial establishments to apply for L-RSL licences?: Only as a means of supporting regular events. The wording suggests a commercial radio station could establish a L-RSL as a long term "trial"

Question 5: Do you agree with the proposal to offer L-RSLs for one-year as well as five-year period: Agree

Question 6: Do you have any comments on other areas of L-RSL policy, as set out in the 'Notes for Applicants', that you would like to bring to our attention?:

Question 7: Do you agree that we should license 'ADS-RSLs' once the ADS trial ends on 31 August 2006?: Agree

Question 8: Do you agree with the technical characteristics of the licence? If not, what alternative proposals do you have in mind?:

Question 9: Do you agree with our conclusions on the potential interference issues concerning shared programme-making use of the spectrum? If you disagree, please give reasons.:

Question 10: Do the current arrangements ensure that programme-making use of the sub-band at ":

Question 11: If circumstances permit, should 'ADS-RSLs' be available for longer than five days, and if so what is/are the appropriate licence duration(s)?:

Question 12: If circumstances permit, should the link between an ":

Question 13: Do you agree that the availability of 'ADS-RSL' licences should be extended to 'non broadcast' frequency bands other than 60.75 to 62.75 MHz?:

Question 14: Do you have any comments regarding the costs and administration of 'ADS-RSLs'?:

Question 15: Do you foresee interest in accessing up to 8MHz of frequencies in the 55 to 68 MHz band that are presently almost unused, and if so for what types of service and/or technology? Do you have any views on how Ofcom might release this spectrum to the market for use?:
