

About this data: Fixed Parliamentary Constituency area

To create our [Connected Nations Report](https://www.ofcom.org.uk/research-and-data/multi-sector-research/infrastructure-research/connected-nations-2019) (https://www.ofcom.org.uk/research-and-data/multi-sector-research/infrastructure-research/connected-nations-2019) Ofcom collected and analysed data from fixed telecoms operators. This file contains broadband coverage availability and performance data from operators. The availability data also includes coverage information provided by alternative network providers. Further information can be found in the [Connected Nations Methodology](https://www.ofcom.org.uk/research-and-data/multi-sector-research/infrastructure-research/connected-nations-2019/methodology) (https://www.ofcom.org.uk/research-and-data/multi-sector-research/infrastructure-research/connected-nations-2019/methodology).

The coverage availability was collected as a snapshot in September 2019. The previous May 2018 data set is available at <https://www.ofcom.org.uk/research-and-data/multi-sector-research/infrastructure-research/connected-nations-update-summer-2019>. Coverage from Relish (owned by Three) has been excluded. New FWA provision has been included.

The definition for full fibre coverage has been changed. From Sept 2018 it represents where the network has been rolled out to a “lead-in” that will serve the consumer end premise and where the consumer would expect to pay a standard installation charge for that connection.

The performance data was collected as a snapshot in May 2019 and includes information based on the number of connections providing an active broadband service, as opposed to individual premises.

Due to variations in broadband performance over time, the file should not be regarded as a definitive and fixed view of the UK's fixed broadband infrastructure. However, the information provided in this file may be useful in identifying variations in broadband availability.

As a result of the different timing points for these data sets, the files have now been split into coverage availability and performance.

We are providing this data on an open basis via the [Open Government Licence](https://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/) (https://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/) which gives users various freedoms about how they choose to use the data, subject to conditions.

The files are provided as a Comma Separated Values file, with double quote (“) text delimiters where applicable.
