About this data: Mobile coverage, Parliamentary Constituency area

To create our Connected Nations 2023 report, Ofcom collected and analysed data from the four mobile network operators. This file contains mobile coverage information at parliamentary constituency level.

The data was collected as a snapshot in September 2023. The Methodology Annex provides details of our approach to collecting and analysing coverage data.

Due to variations in mobile performance over time, the file should not be regarded as a definitive and fixed view of the UK's mobile infrastructure. However, the information provided in this file may be useful in identifying variations in mobile performance by geography.

If you have any questions or feedback on the data, please contact us at open.data@ofcom.org.uk.

We are providing this data on an open basis via the Open Government Licence, which gives users various freedoms about how they choose to use the data, subject to conditions.

The files are provided as a Comma Separated Values file, with double quote (") text delimiters where applicable.
