

Key Commitments

Licence number: CR102194

Service name	GLOW RADIO
Licence area	Farnborough and surrounding areas (as shown in the licensed coverage area map)
Frequency	106.5 MHz

Description of character of service

GLOW RADIO serves under-30s who live, work and study in Farnborough and surrounding areas. The service provides dedicated shows to provide a voice to local young people and showcase their talents, and works with the community to find opportunities to teach young people new skills through courses and training.

The service broadcasts:

- Music. The main types of music broadcast over the course of each week are: mainstream music from the 1990s to present day, with some music from the 1980s. Specialist music will also feature, including a specialist dance music show, an urban music show and specific decades music show
- Speech. The main types of speech output broadcast over the course of each week are: travel news, and community and local information.
- Programming in English.
- The service provides original output¹ for a minimum of 84 hours per week.
- The service provides locally-produced output² for a minimum of 42 hours per week.

The studio is located within the licensed coverage area.

The service provides a range of community benefits (social gain objectives mandated by statute) for the target community, both on-air and off-air, and in doing so, achieves the following objectives:

- the facilitation of discussion and the expression of opinion,
- the provision (whether by means of programmes included in the service or otherwise) of education or training to individuals not employed by the person providing the service, and
- the better understanding of the particular community and the strengthening of links within it.

¹ Original output is content which is first produced for, and transmitted by, the station and excludes output that was transmitted elsewhere before. Original output can be live, pre-recorded or voice-tracked. Repeat broadcasts of original output and continuous music with no speech content other than advertisements, station idents and/or outsourced news bulletins (i.e. news bulletins produced by a third party) do not meet Ofcom's definition of original output.

² Locally-produced output is content which is made and broadcast from within the station's licensed coverage area. It may include all types of local production including repeats and continuous music, as long as it is created anywhere within the licensed coverage area and is not material that is networked from other stations. Content which is made outside the station's licensed coverage area, but edited and broadcast from within the coverage area, does not meet Ofcom's definition of locally-produced output.

Members of the target community contribute to the operation and management of the service.

The service has mechanisms in place to ensure it is accountable to its target community.
